

SIMPLY CLEVER

ŠKODA

THE NEW ŠKODA YETI

Inspiration awaits with the **New ŠKODA Yeti** no matter which road you take. Whether it's the city, with its changing architecture, lights and incessant rhythm, or the countryside, where the road ends and a world full of secrets begins...

The new Yeti comes in two distinctive versions: the Yeti and the Yeti Outdoor. So you can venture through the streets of your city and see them from a new perspective, or seek adventure off the beaten track. Moreover, you can shape the character of your car with a selection of engines, front-wheel or 4-wheel drive, plus a range of accessories.

As a member of the ŠKODA fleet, the Yeti model also offers numerous Simply Clever details and solutions. For example, the handy torch in the luggage compartment will always show you the way in the darkest of woods.

It's a small detail but, just like in life, it's the little things that often make a big difference. And this thinking guides everything we do.

That's Simply Clever. That's ŠKODA.

And this is your New ŠKODA Yeti.

CLEVER INSIDE

Simply Clever details and solutions as well as storage compartments significantly increase the practicality of the car. Namely, they simply multiply its transport options, help keep the car tidy, and make travelling more pleasant for all passengers

There are situations when you must act quickly and a **reflective vest** tucked away at the bottom of the luggage compartment under luggage could delay you. You can find it right away under the driver's seat.

You never know what you will have to load into the car and transport somewhere else. If you need to, you have the option of **folding down the backrest of the front passenger seat**.

While the driver enjoys driving, the rear passengers can simply amuse themselves. But first they must **fold down the tables**.

You surely cannot imagine your home without a **waste basket**. And yet, you also spend part of your life in the car.

There are things that come in handy not only on the road. Next time you are at home looking in vain for a working **torch**, you will know where to find one.

The **VarioFlex rear seating system** enables even the daintiest of women to effortlessly create the maximum comfort for passengers and plenty of space for luggage.

The Yeti model line comes with a fresh exterior that reflects the current design language of ŠKODA. Simultaneously, the Yeti offers specific solutions depending on the version of the car. **Yeti and Yeti Outdoor** are two design lines that are based on the different requirements placed upon SUVs and their utilisation. Although the differences in the designs are evident at first glance, both versions have a lot in common. Most noticeable are the new shape and placement of exterior features,

YETI

The stylish **Yeti**, of course, can go anywhere, but city streets really suit it. Perfect visibility when driving will give you a pleasant feeling and confidence behind the wheel, something which is invaluable in city traffic. As a compact SUV, the Yeti even enables you to park in limited spaces.

The distinctive yet practical design of the Yeti version distinguishes itself with its **body paint coloured features**. These include **protective side door strips, decorative door sill strips and bumpers** including the lower part. Another important distinguishing feature of the car is the fine **honeycomb grille** of the air intake opening on the front bumper. **Roof railings** come in either silver or black. The attractiveness of the Yeti version and its urban elegance is highlighted by **alloy wheels** (pictured are 17" Scudo alloy wheels).

determined by the design language of ŠKODA. These features include the bonnet, front grille, headlamps and fog lamps. The ŠKODA logo dominates the bonnet. The front wings, both bumpers and the 5th door have also undergone design changes.

YETI OUTDOOR

The exterior of the rugged **Yeti Outdoor** makes its adventurous nature immediately clear. Discovering unknown places can be extremely exciting and at first glance it is clear that the outdoor version of the car is well prepared for that.

Two-colour or black **roof railings, black protective side door strips, bumpers with black lower parts**, as well as massive **vertical fins** on the air intake opening on the front bumper, and attractive **alloy wheels** (pictured are 17" Matterhorn alloy wheels) are all features that emphasise the individuality of the Yeti Outdoor version. Additionally, the car has a **higher approach/departure angle**, thus enticing you to head off the beaten track.

The confident expression of both versions is enhanced by **Bi-Xenon headlamps with LED daytime running lights** with strips located in the lower part of the lamp. The LEDs (Light-Emitting Diodes) fit well with the crystalline design of the front and simultaneously offer energy savings and a long service life. The shape and location of the **fog lamps** reflect the current design language of ŠKODA and are available with the Corner function.

The **rear lights**, with double C-shaped illumination, can be equipped with high-power LED diodes, which function as running and brake lights.

The **rear bumper** with the attractive silver cover in the urban style is one of the distinctive features of the Yeti version. In the rear you will discover many features that are now typical for the ŠKODA make: the logo, ŠKODA lettering, model name, triangular recesses defining the space for the number plate, and longitudinal reflectors for better visibility of the car.

The Yeti Outdoor will captivate you with its **massive bumper** and silver protective cover, which cannot be overlooked as it perfectly stands out next to the black plastic parts.

You will enjoy seeking out new adventures even more with the **electrically-adjustable panoramic roof window**, which allows you to create a large open space above the front seats.

The **VarioFlex rear seating system**, which comes as standard equipment in both versions of the car, allows you to customise the interior according to your current situation and needs. It's comprised of three independent rear seats, which allows you to not only fold down each one independently but also to easily remove them.

The **net programme**, which reliably prevents things from shifting, offers several layout options.

The **removable LED torch** in the luggage compartment can come in handy when driving at night and during other circumstances. When clipped in, it automatically recharges while the engine is running.

The **fastening system** in the luggage compartment with **horizontal slats** and **sliding hooks** can be utilised in various ways. Hanging shopping bags is but one option. You can also use the system for securing things with the net or for holding the trays in the luggage compartment in the lower position (not shown).

The **mid-level luggage compartment floor** provides you with a hidden storage compartment. Simultaneously, the Simply Clever feature facilitates handling luggage by bringing the floor of the luggage compartment closer to the loading edge.

You can use the **double-sided carpet** with the textile side up if you are not carrying anything that could dirty the car. When needed, simply turn it over with the washable rubber side up (shown).

Closer inspection reveals many **storage spaces and compartments** because the entire concept of the interior is Simply Clever. Everything you need has its place in the interior including keys, mobile phones, glasses, parking tickets, maps, refreshments and any other necessities that you carry in your car. And, most importantly, you always know where to find them.

The **eyeglasses compartment** is located in the roof panel above the interior rear-view mirror, so the driver always has his sunglasses or driving spectacles within reach.

If you want to take some refreshments with you on your trip, you will surely welcome the **dual drinks** holder on the centre console.

The **closed storage compartment** beside the front passenger can be air conditioned, so you will have pleasantly cool drinks during your trip.

The **parking ticket holder** on the edge of the windscreen is a practical detail that will ensure that your parking ticket is always in a highly visible location.

The **storage compartment** for small items in the upper part of the instrument panel can be easily opened by touching the lid.

A special **pocket for a reflective vest** is located under the driver's seat, ensuring it's immediately within reach if you need it.

The **foldable backrest of the front passenger seat** gives the car even greater variability and allows you to transport objects with extraordinary dimensions.

The **removable Unibag**, which is designed for transporting skis or snowboards, can be easily pushed through the opening between the luggage compartment and the passenger compartment.

Rear seat passengers will appreciate **foldable tables with drink holders**, built into the backrests of both front seats, which of course can be used for more than just refreshments.

When the **waste basket** is full, it can be easily removed and emptied. It can be inserted into the **storage compartments** in both the front and rear doors. The storage compartments in both front doors can hold a 1-litre bottle.

Rear seat passenger comfort is enhanced by a **drink holder**, which along with other accessories, such as a lighter and ashtrays, is part of the function package.

Advanced technology facilitates the driver's control of the car and increases passenger comfort. That is why the new Yeti model line offers a wide range of options such as radios, navigation and parking systems, and steering wheels. You will steer the Yeti and Yeti Outdoor solely with a **3-spoke steering wheel**, which is available in several versions. The top option is a **leather sports multifunctional steering wheel** with radio and telephone controls.

On long journeys on the motorway you will surely make full use of the **cruise control**, which is able to automatically maintain a constant speed. Additionally, you have the option of increasing or reducing speed without using the pedals. This function is controlled by a button on the side of the cruise control.

If you want to greatly reduce the stress of parking, then the **Automatic Parking Assistant** is a great helper. It will select an appropriate parking place, park in a row of parallel or perpendicular parked vehicles, and can even drive out of a row of parallel parked vehicles. When parallel parking, it only needs a space 60 cm longer than the car itself (pictured is the Automatic Parking Assistant on the Maxi DOT display).

The **recommended gear shift function** is displayed in the top right corner of the Maxi DOT or on the on-board computer display.

A new feature of the Yeti model line is the **KESSEY system** (Keyless Entry, Start and exit SYstem), which enables you to use the car without a key. To switch the engine on and off you simply use the **Start/Stop button**.

For easier parking, your car can be equipped with the **Optical Parking Assistant**. It uses a camera located on the 5th door handle monitoring the space behind the car and indicating the driving lines, based on the vehicle width. This assistant system is always supplied with parking sensors and a navigation system, which shows your progress during parking on the display.

The **Amundsen+ navigation system**, controlled via a 5" touch-screen display, will reliably lead you to your journey's destination. Your Amundsen guide can give you detailed voice directions and its strength is a sophisticated system for receiving traffic information.

If you decide on one of the navigation systems, its wide display will feature, among other things, the **parking sensor function**, which uses visual and audio signals to report the distance from obstacles.

The **Columbus navigation system**, with a 6.5" touch-screen display and voice command function, features the fast calculation of a route and a precise display. The instrument features the reception of DAB (Digital Audio Broadcast) and offers, among other things, off-road navigation. This feature enables you to record and save routes taken by the vehicle off the digitised road network, such as unpaved roads.

The **Swing radio** will provide you with great listening pleasure when playing your favourite stations and CDs and will also ensure that you receive the latest traffic information. The radio features a dual antenna and CD, CD-MP3 and CD-WMA players.

You will especially appreciate the **external mirrors that retract automatically** once you lock the car when parking on city streets.

Climatronic, dual-zone air conditioning with electronic regulation and automatic air circulation, gives you the option of setting a different temperature for the left and right sides of the interior.

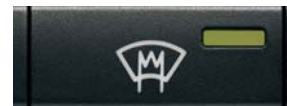

The illumination of the entry area by **Boarding Spots**, integrated into the external mirrors, enables you to safely enter and exit the car even in complete darkness.

Noble steel foot pedal covers increase your feeling of comfort.

The **electrically-adjustable driver seat** is equipped with memory, which can store three different positions of the seat and the external mirrors.

The **electrically heated front windscreen** will quickly clear frost or steam and you are thus guaranteed a clear view in any weather.

On an exciting journey in pursuit of new experiences, the **panoramic sunroof** gives you the feeling of unlimited space and freedom. The front part of the sunroof can be tilted up and slid backwards. The rear part is firmly built into the roof. The tinted glass, of which both parts are made, has lower light transmission and thermal permeability, so it helps create an optimum climate and comfort inside the car. If needed, you can cover the entire sunroof with an electrically-adjustable roll cover.

Whether on your daily drive to work or in pursuit of adventure, the Yeti provides you with **maximum safety**. In addition to excellent road holding, which can also be credited to advanced systems such as **ESC** (Electronic Stability Control), the Yeti has many **passive safety features**, whose task is to protect the passengers in extreme situations.

The **head airbags**, which create a "wall" along the side windows when activated, protect passengers' heads in the front and rear.

While the **driver airbag** is hidden in the steering wheel, the **passenger airbag** is located in the dashboard. If needed, it can be deactivated so that you can fit a child seat in the front seat.

The **front side airbags** protect the pelvis and chest of the driver and passenger in the event of a side collision. The height-adjustable **WOKS front headrests** are designed to protect the neck in case of a rear impact.

The **Driver Activity Assistant** evaluates data from the power steering sensors at speeds above 65 km/h. When the system detects behaviour indicating that the driver might be tired (such as more intensive driving direction corrections with the steering wheel), it recommends taking a break.

The **driver knee airbag** prevents contact with the lower part of the dashboard in the event of a collision.

The **rear side airbags**, which are activated by a side impact, protect the pelvis and chest of the passengers on the side rear seats.

The **double sun shield** protects the driver and front passenger from blinding rays from both the front as well as the side.

The **third headrest** in the rear is height adjustable and increases the safety of the passenger in the middle seat.

GreenLine vehicles reflect our continuous effort to reduce CO₂ emissions. The highly advanced technical solutions enable us to offer you exceptional concern for the environment with driving comfort. The **ŠKODA Yeti and Yeti Outdoor GreenLine** features, among other modifications, the Start-Stop system, braking energy recovery system, tyres with low rolling resistance, and a lower chassis. It is powered by the **diesel engine 1.6 TDI CR DPF/77 kW**, which achieves **combined consumption of 4.6 l/100 km with CO₂ emissions of 119 g/km**. The GreenLine version can be immediately identified by the original badge on the front grille.

The **GreenLine badge** is also located on the rear of the car.

The **Start-Stop system** automatically switches off the engine while waiting at traffic lights or when moving slowly in a queue of cars. By pressing the clutch pedal the engine automatically restarts. The driver can deactivate the system with a button located on the central console. The **energy recovery function** reduces engine load and results in more economical operation. The function effectively utilises the automobile's kinetic energy to recharge the battery.

On the Yeti GreenLine version **16" Dolomite alloy wheels** and tyres with low rolling resistance are standard.

On the Yeti Outdoor version **16" Nevis alloy wheels** and tyres with low rolling resistance are standard.

With consideration for the future. The environmentally-friendly ŠKODA Yeti and Yeti Outdoor GreenLine.

Perfect for street canyons, shopping terrains and the urban jungle. The ŠKODA Yeti Monte Carlo.

The **ŠKODA Yeti Monte Carlo** comes with **black exterior elements**, which give the car a unique style and a ferocious expression. The specific features in the black design include the front fog lamps, the front grille frame, the front bumper spoiler, the external mirrors and the plastic guards lining the lower part of the vehicle. The Monte Carlo version is further characterised by a black roof with a spoiler, **LED rear lights** and a **decorative exhaust pipe end piece**. It's also equipped with **SunSet** windows with a higher density of tint in the rear. The car is available as both a 4-wheel and front-wheel drive in selected body paint colours.

The **interior** features sports seat upholstery in a black/red combination. The **3-spoke steering wheel** in black perforated leather is decorated with red stitching.

The **front door sill strips** with a Monte Carlo inscription have both decorative and protective functions.

The distinct style is underlined by the two-colour **17" Origami alloy wheels** in a Monte Carlo design.

Whether you are attracted to the stylish Yeti or you prefer the more adventurous Yeti Outdoor version, you can always choose between front-wheel or 4-wheel drive. If you choose **4-wheel drive** in combination with the **off-road system**, you can easily negotiate difficult terrain. The off-road option includes a number of functions such as **hill descent assistant**, the adaptation of systems such as **ABS** (Anti-lock Braking System), **ASR** (Anti-Slip Regulation) and **EDS** (Electronic Differential System) to the driving conditions and a more sensitive accelerator pedal configuration. Another great helper that will prove itself is the start-up assistant, which helps you start moving up a hill.

The combination of two of the latest technologies is offered by cars equipped with 4-wheel drive and an **automatic DSG** (Direct Shift Gearbox), which is available in 6-speed or 7-speed versions depending on the engine. The DSG gives you great acceleration and enables you to maintain the engine at optimum revolutions per minute. If you maintain an economical driving style, you will achieve low fuel consumption and thus lower CO₂ emissions.

Pressing the **off-road** button activates functions that will help you safely cope with difficult terrain.

4-wheel drive is provided by an inter-axle **Haldex clutch**. The coupling of the rear axle is automatic, so under normal conditions the car can utilise the advantages of front-wheel drive, and under extreme conditions, the excellent traction of 4-wheel drive.

The pleasure of drives full of adventure. The ŠKODA Yeti and Yeti Outdoor 4x4.

It's made for excitement. The ŠKODA Yeti Outdoor Adventure.

When you are in the mood and have the courage to head out for some exciting experience, you will appreciate a partner who shares your passion: the **ŠKODA Yeti Outdoor Adventure**. The distinctive exterior elements include, among others, the **17" silver/metallic black alloy wheels, two-colour roof railings** and **SunSet** windows with a higher density of tint in the rear. In addition, it can feature a black roof and black rear-view mirrors. It's available as both a 4-wheel and front-wheel drive in selected body paint colours.

The **Adventure interior** comes in the Onyx colour with Techno décor. The seats have exclusive upholstery with a tyre tread pattern and silver stitching.

The **decorative door sill strips** with noble steel inserts with an Adventure inscription represent another distinctive equipment of this model.

The dynamic sports appearance of the car is enhanced by the exclusive silver/metallic black **17" Matterhorn alloy wheels**.

The **ŠKODA Yeti and Yeti Outdoor Laurin & Klement** represent the highest equipment versions. They provide exceptional comfort and captivate with original elements, premium materials and advanced technology. In addition to features uniquely available for the L&K version, you can look forward to other excellent standard equipment, such as the **Bi-Xenon headlamps** with LED daytime running lights, **SunSet** and **Bolero radio**. The cars are available as both a 4-wheel and front-wheel drive with selected high performance engines.

The **brown leather interior** is lined with a Piano Black décor. The **3-spoke leather multifunctional steering wheel** allows you to control the radio and telephone.

The **Laurin & Klement plaquette** can be found on both front mudguards.

The **decorative door sill strips** with noble steel inserts and a Laurin & Klement inscription are another stylish detail.

The Yeti L&K is equipped with the elegant two-colour **17" Annapurna alloy wheels**.

The Yeti Outdoor L&K comes with the impressive two-colour **17" Origami alloy wheels**.

Makes every day exceptional. The ŠKODA Yeti and Yeti Outdoor Laurin & Klement.

The **Elegance** equipment level is available either with black fabric upholstery with the dashboard in black/black colour combination, or Gobi Sand fabric upholstery with the dashboard in black/Gobi Sand colour combination. While the colours are the same for both the Yeti and Yeti Outdoor versions, each of them has a distinctive fabric design. The dashboard is lined with the Elegance décor. We further offer the following optional interiors for this equipment level: leather/artificial leather in black or Gobi Sand colour or Alcantara/leather/artificial leather in black or Gobi Sand colour. Both have the dashboard either in black/black or black/Gobi Sand colour combination depending on the interior colour option. You may also choose Sport interior with red or silver fabric upholstery.

The **Ambition** equipment level comes in either black or Terracotta fabric upholstery. While the colours are the same for both the Yeti and Yeti Outdoor versions, each has a distinctive fabric design. The dashboard in black/black colour combination is lined with the Ambition décor. We further offer the following optional interiors for this equipment level: leather/artificial leather in black or Terracotta colour or Alcantara/leather/artificial leather in black colour, both with the dashboard in black/black colour combination. You may also choose Sport interior with red or silver fabric upholstery.

The basic **Active** equipment level is offered in the same design for both the Yeti and Yeti Outdoor versions: with black fabric upholstery, black/black dashboard and Active décor strip.

The **Sport** interior available as extra equipment is available for both the Yeti and Yeti Outdoor model versions. You can choose between red or silver fabric upholstery. The dashboard is in black/black colour combination lined with the Elegance décor.

Combinations of body paint and interiors: ● available – not available

Express your individuality. ŠKODA Genuine Accessories.

The **double-sided carpet** provides a universal solution for the bottom of the boot. The velour side provides standard protection from soiling, while the non-slip plastic on the reverse side is there for transporting dirty or wet objects.

The **plastic boot dish** with raised edges prevents the car upholstery from getting soiled or damaged. The dish can be easily taken out and emptied or wiped clean.

The **protective cover of the rear bumper** will prevent any scratches when loading or unloading objects.

The **rear bumper cover foil** protects the rear bumper as well as the loading edge, while the triangle-shaped stripes improve visibility of your car.

The **net under the parcel shelf** is not only a suitable storage place for an umbrella but anything you may want to separate from the other luggage as well.

The **decorative door sill covers** with aluminium inserts effectively protect the door sills against mechanical damage when getting in and out of the car.

The **mud flaps** protect the chassis from mud and flying stones.

The **17" Blossom alloy wheels** in a sports-elegant style will perfectly complement the design of both versions of the Yeti model.

The **detachable tow bar** will allow you to tow a trailer with brakes of up to 2,100 kg, based on the engine version.

The **clothes hanger** is an extremely practical accessory, mainly for those who travel to work wearing a suit.

You can find these products in ŠKODA Genuine Accessories. You can also find information on the complete assortment of accessories at your authorised ŠKODA partner.

General information

ŠKODA Service

Put your car in good hands. We give you good reasons to choose an authorised ŠKODA service partner.

We offer you first-class quality

Your car requires advanced technology. All the authorised ŠKODA service partners have special tools and quality diagnostic systems at their disposal to ensure the perfect functionality and reliability of your car.

Professionally trained staff by the manufacturer

The ever-rising standard of the technology used in our cars requires corresponding professional qualifications on the part of the staff. To meet this requirement, the manufacturer organises regular training for the authorised ŠKODA service partners in order to provide them with up-to-date information important for their activities.

Our motto: be fair and open with our customers

Careful, professional and friendly counselling for the customers upon acceptance of orders is just as important to us as diligence and completeness with respect to repairs and maintenance work. All this is continuously monitored by internal quality control.

Comprehensive range of services:

› Service inspections

The authorised ŠKODA service partner guarantees the performance of regular service inspections in accordance with the manufacturer's instructions and ensures the long-term functionality of your car. The service schedule informs you when the service inspection must be done.

› Body and paintwork service

Damage to the body and painted areas will be fixed by your authorised ŠKODA service partner in an expert manner, in accordance with the manufacturer's instructions, using ŠKODA Genuine Parts. This is important not only for your safety, but also for functionality and maintaining your car's value.

› Courtesy car

The authorised ŠKODA service partner can provide you with a courtesy car for the period of repair or service inspection.

› Pick up and delivery service

If you are unable to take your vehicle to the ŠKODA Service, an authorised ŠKODA service partner will arrange a date with you to pick up the car. The car will be delivered back to you after the service work has been completed.

The listed services represent only part of the wide range of ŠKODA Service offers, which may vary from country to country. Please contact your authorised ŠKODA service partner for further details.

ŠKODA Applications

ŠKODA Service App - ŠKODA Service in your pocket

The ŠKODA Service application is designed for smartphones operating on iOS and Android systems and its purpose is to help ŠKODA customers in any difficult situation they may encounter on their travels.

ŠKODA Manual App - know your vehicle

The ŠKODA Manual application is aimed at users of tablet PCs who

are interested in ŠKODA vehicles or already own one. The application contains a full featured digital version of the owner's manual for all current ŠKODA models.

ŠKODA Genuine Accessories

ŠKODA Genuine Accessories offer you a wide assortment oriented to five main product groups (sport and design, music and communication, comfort and utility, transport and safety) and bicycle products. For more detailed information on the complete ŠKODA Genuine Accessories range see the individual ŠKODA model catalogues.

ŠKODA Genuine Parts

Safety

ŠKODA Genuine Parts are identical to those used in the assembly of ŠKODA vehicles. The use of first-class materials and technologies guarantees safe and worry-free motoring.

Availability

ŠKODA AUTO offers a complete range of parts and equipment items used in the vehicle's series production and does not merely focus on high-turnover parts. Our objective is to secure ŠKODA Genuine Parts supplies essential for the operation of the vehicle for a period of 15 years after the end of the model run.

Long service life

The use of first-rate materials and manufacturing technologies applied in the production of ŠKODA Genuine Parts ensure their maximum reliability and long life. As proof, we have extended the genuine batteries warranty to three years.

Environment protection

The ŠKODA Genuine Parts range includes exchange parts, which are manufactured with a low environmental impact in terms of waste, excess heat and water contamination.

Information on the internet

Information is available at www.skoda-auto.com to assist you in deciding which vehicle suits your needs, thanks to the detailed descriptions and photographs of all our models. Visit www.facebook.com/skoda and become a fan of ŠKODA to receive the latest updates and get in touch with our community.

ŠKODA Finance

ŠKODA Finance provided by ŠkoFIN offers solutions for both individuals and businesses. Purchase your car with favorable conditions without additional costs. You can learn about the current credit or lease offer through any authorised ŠKODA partner.

Global fleet

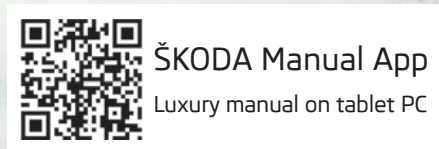

The ŠKODA AUTO Global Fleet Services offer B2B fleet solutions to customers with all kinds of requirements. A fleet made up of ŠKODA cars offers unmatched roominess, long-lasting quality, safety, low total costs of ownership and as a result excellent value for money. You can find more information about our products and services at www.skoda-auto.com/fleet.

One of the most important goals of ŠKODA AUTO is the development and manufacture of products that are as environmentally friendly as possible throughout their life cycle phases, placing principal emphasis on the selection of recyclable materials. Our ŠKODA cars are produced using progressive types of technology in modern production facilities that meet the strictest criteria. Anticorrosive protection of the cars' painted parts is based exclusively on lead-free cathaphoresis (KTL) and water-soluble paints.

Our company strategy includes limiting fuel consumption and emissions. As a result, the engines we offer meet the current emission regulations. All ŠKODA products are made using manufacturing processes that adhere to the laws and regulations concerning the protection of soil and water. As a result of these activities, ŠKODA cars meet technical, safety, quality and environmental requirements. ŠKODA AUTO contributes to the preservation of a clean environment and provides mobility and comfort to its customers.

The environmental logo expresses ŠKODA AUTO's awareness of, responsibility for and attempts at the sustainable development of the company and a friendly approach to life and nature. 

Some models in this catalogue are shown fitted with optional or extra equipment not necessarily included in the standard equipment. All details of technical specifications, design, equipment, materials, guarantees and appearance were accurate at the time of going to print. However, the manufacturer reserves the right to make any changes without prior notice. The information included in this catalogue is for guidance only. Due to printing technology limitations, the colours of paints or other materials shown in this catalogue may differ from reality. For up-to-date information and further details on standard and optional equipment, current prices and delivery terms and conditions contact your authorised ŠKODA partner. This catalogue was printed on cellulose paper which was bleached without using chlorine. The paper is 100% recyclable.
