# The Amarok

Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.

**Life is full of challenges.**

**Are you ready?**

Where others reach their limits, the Amarok makes its way without compromise. It unites cross-country mobility, flexibility and efficiency like no other pickup: thanks to the optional all-wheel drive, the outstanding off-road safety – thanks to the special Off-road ABS and its aligned electronic stabilisation programme – with the broadest load area in its category and last but not least, thanks to the robust ladder frame chassis, which offers a high level of stability during even the toughest assignments. The Amarok breaks new ground on conventional roads as well: with its high-quality interior and driving characteristics that leave nothing to be desired, it also sets a whole new standard in terms of comfort and dynamics.

**02 The Amarok.**

**1<sup>st</sup> challenge:**

**You want to get to work on time. Take a short-cut by driving through the river.**

**Solution:**

**Selectable 4MOTION all-wheel drive  
for perfect cross-country mobility.**

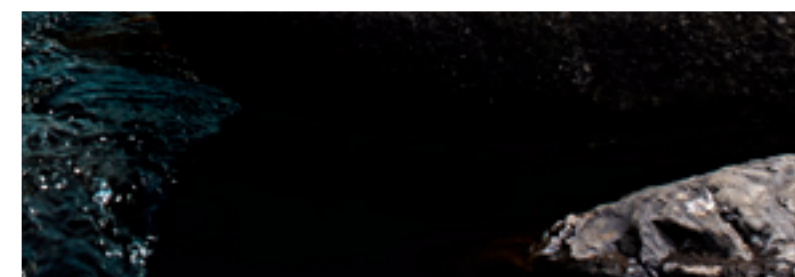

Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.

**2<sup>nd</sup> challenge:**

**Transport a load from  
A to B. There's a hill with  
12% incline on the way.**

**Solution:**

**The 2.8 t trailer load capacity that  
can face all kinds of challenges.**

Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.

**3<sup>rd</sup> challenge:**

**Drive through difficult terrain.  
And feel like you're travelling  
in a limousine.**

**Solution:**

**An ergonomic design, high-quality workmanship,  
low interior noise – for outstanding driving comfort.**

**4<sup>th</sup> challenge:**

**You are accompanying the  
toughest rally in the world. Make  
as few fuel stops as possible.**

Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.

**Solution:**

**Highly efficient drive concepts for  
a range of up to 1,090 km.**

**5<sup>th</sup> challenge:**

**You want a pickup that can offer  
the best performance on all terrains.  
Don't compromise.**

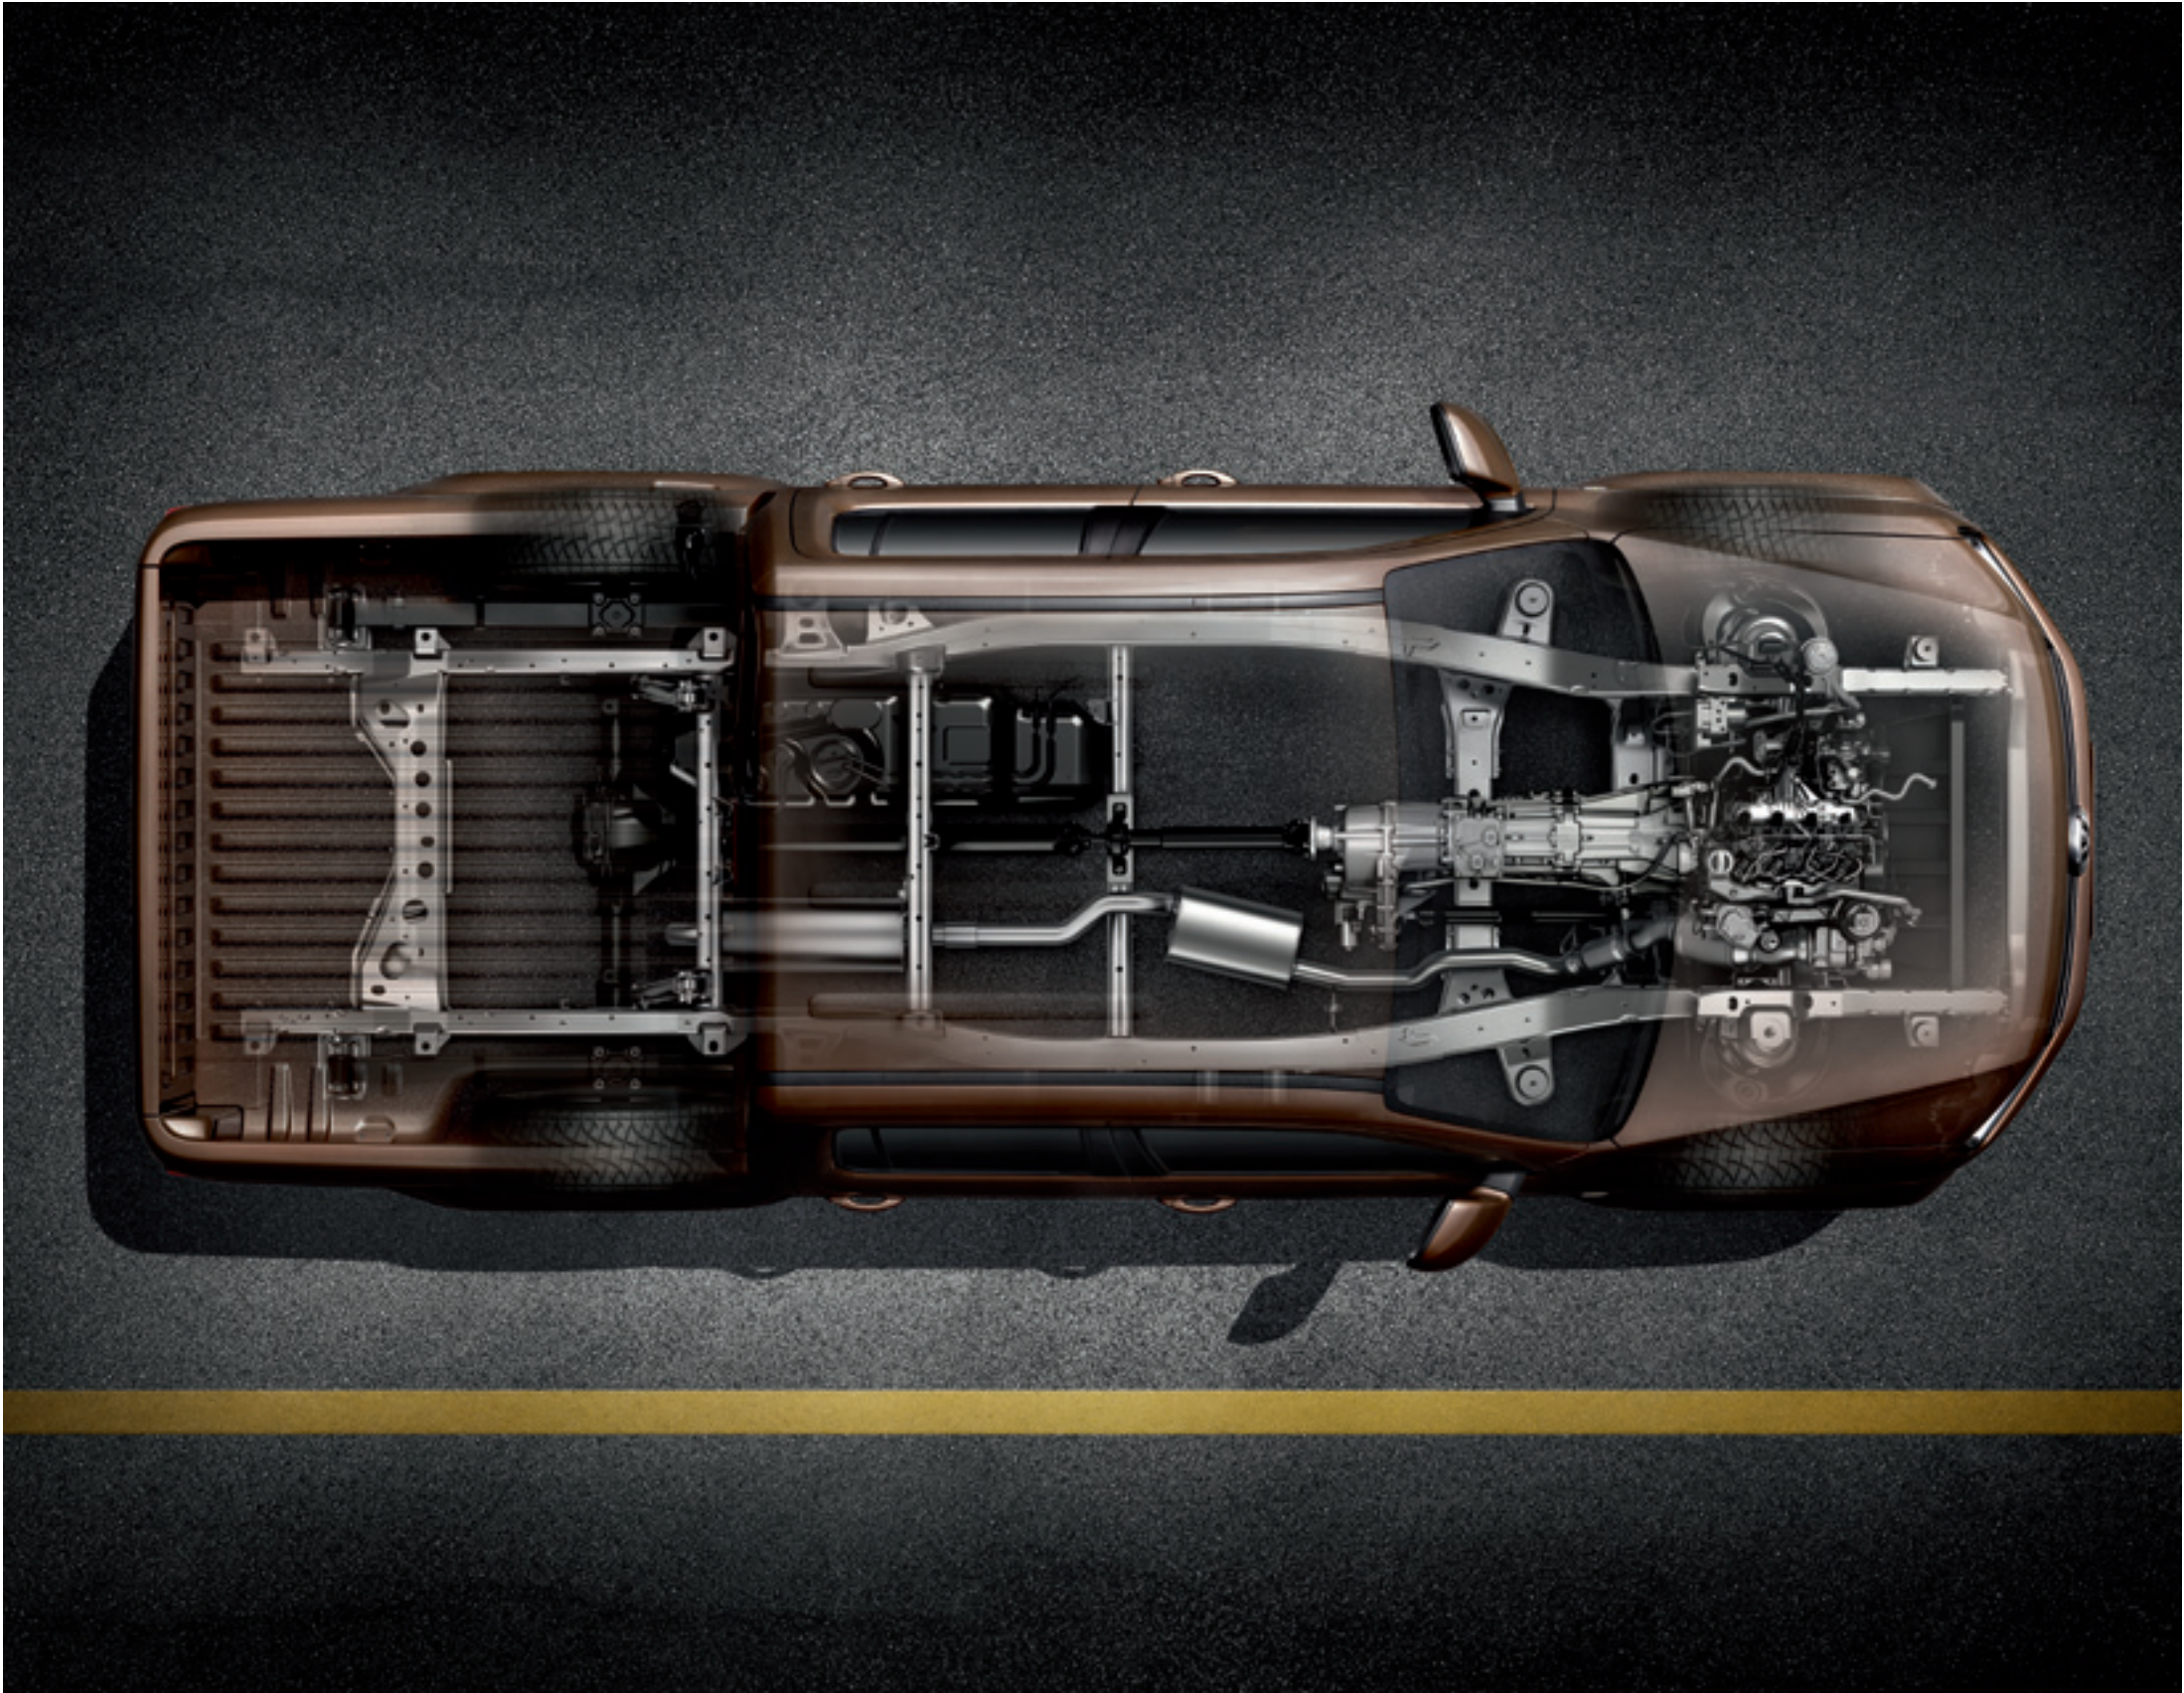

Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.

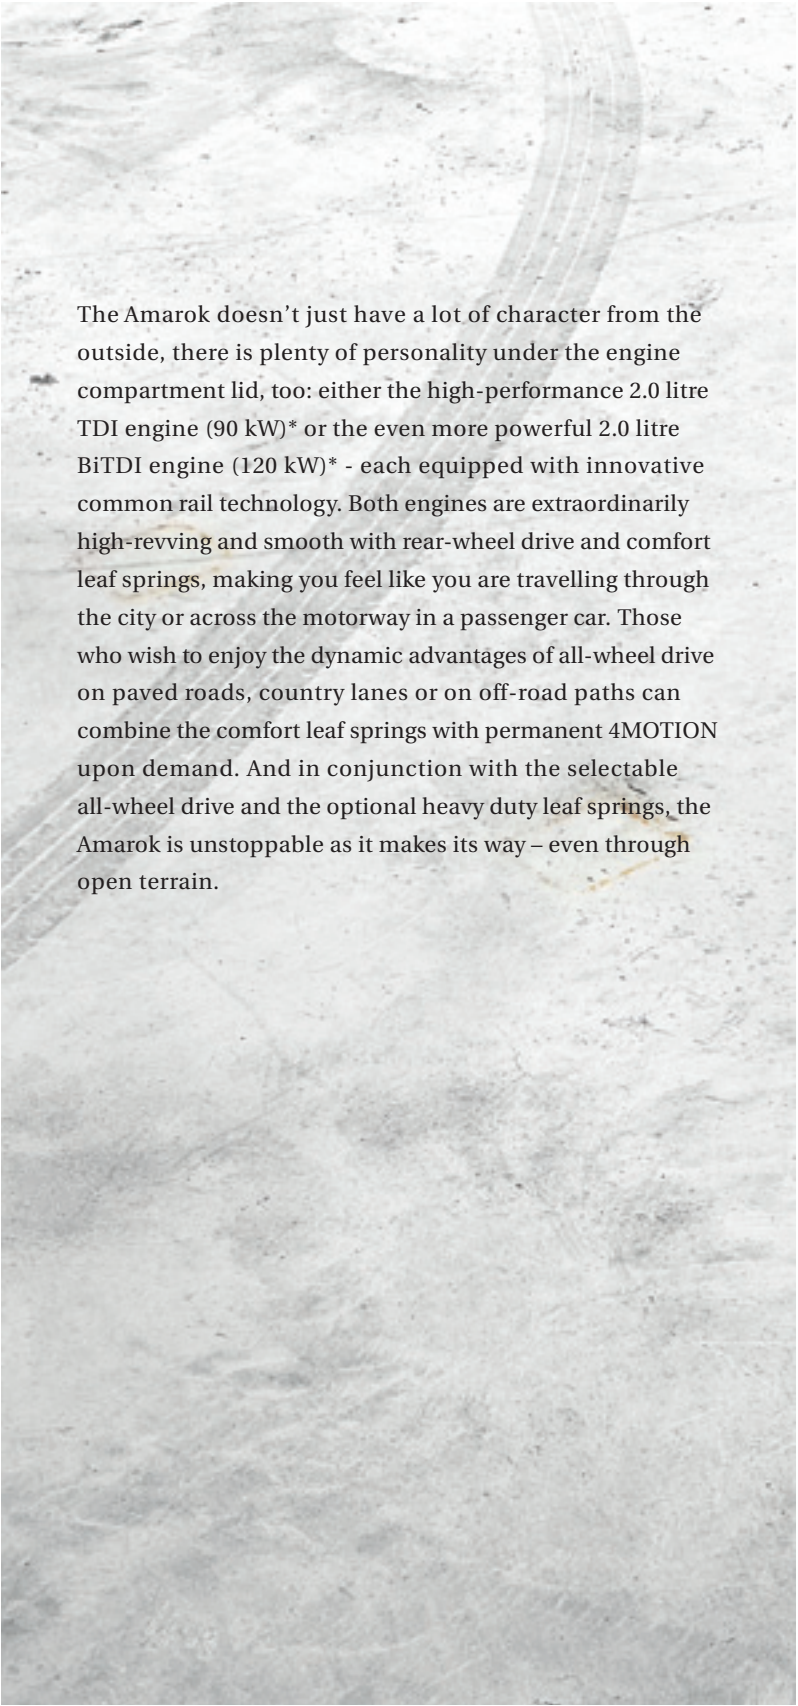

**Solution:**

**Two powerful 2.0 litre TDI engines\*, three drive concepts and two types of spring elements.**

Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.  
\*Please refer to page 44 for information on fuel consumption and CO<sub>2</sub> emissions.

The Amarok doesn't just have a lot of character from the outside, there is plenty of personality under the engine compartment lid, too: either the high-performance 2.0 litre TDI engine (90 kW)\* or the even more powerful 2.0 litre BiTDI engine (120 kW)\* - each equipped with innovative common rail technology. Both engines are extraordinarily high-revving and smooth with rear-wheel drive and comfort leaf springs, making you feel like you are travelling through the city or across the motorway in a passenger car. Those who wish to enjoy the dynamic advantages of all-wheel drive on paved roads, country lanes or on off-road paths can combine the comfort leaf springs with permanent 4MOTION upon demand. And in conjunction with the selectable all-wheel drive and the optional heavy duty leaf springs, the Amarok is unstoppable as it makes its way – even through open terrain.

**6<sup>th</sup> challenge:**  
**You want a pickup that suits you.**  
**Choose one of three equipment lines.**

## The robust and practical solution: The Amarok.

Even the toughest challenges are easy assignments for the Amarok: it has been designed to consistently provide high resilience and functionality – from the broadest load area in its category to the standard electronic stabilisation programme, which automatically adjusts to the load conditions, to the comfortable seats in durable “Spacer” Anthracite fabric.

When you’re on the road, the “RCD 210” radio system with an MP3-compatible CD-player is sure to put all passengers in a great mood. The Amarok offers that little bit extra at all times – particularly in terms of its passenger compartment space. Look forward to generously laid out leg and head room, which remains unequalled in this category. And your tools and small objects have also been taken into consideration: lots of practical storage trays provide ample space to store everything in an orderly manner.

The vehicle is equipped with a black grained rear bumper as standard. This feature may also be deselected upon demand, in which case the tailboard can be completely folded down at a 180° angle for increased ease of loading.

Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.

The Amarok can transport large quantities – and therefore takes even the toughest challenges in its stride. This is ensured by the 2.52 m<sup>2</sup> load area, which can be sprayed with a robust special coating upon demand. The particularly low load platform height

and the large tailboard make loading and unloading as easy as possible. And in case you wish to explore difficult roads off the beaten track, you can equip your Amarok with all-wheel drive – with a choice of either permanent or shiftable 4MOTION.

Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.

Working materials, tools, manpower. With the Amarok, you'll be able to carry enough of everything you need and comfortably seat up to five people. A Euro pallet can be loaded crosswise on the load area – the broadest in its category. In combination

with the robust heavy duty leaf springs, a payload of up to 1,147 kg is possible. And in case of rain, you can safely store your brick trowel and power drill in the double-cab – because the cinema-style rear seating can be divided 1/3 to 2/3 and folded in part or entirely.

No matter what you transport with your Amarok – bales of straw for the stables, seed potatoes for the field or silage for the animals – it can handle any load effortlessly thanks to its high payload and its enormous pulling power. To ensure that everything stays in place,

the load area has four lashing eyes that can be used to secure your load with tie-down belts. And should your journey take you over sticks and stones, this is not a problem either. An underride guard is available as an option to protect the engine and gearbox from heavy blows.

Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.

The pickup with certain extras. Compared to the basic model, the Amarok Trendline offers an even more dynamic design of the exterior and enhanced interior equipment functionality. It is equipped with top-quality 16" alloy wheels "Taruma" as standard. Additionally, the door handles, door mirror housings and the front bumper with chrome applications on the upper radiator grille are painted in the colour of the vehicle. Two fog lights are integrated in the bumper as standard.

Inside the passenger compartment, the seats are upholstered with the fabric "Trail" – available in Anthracite or Buffalo. A centre armrest provides added comfort. Particularly practical: small items can be stored in drawers under the front seats.

The "RCD 210" radio with an MP3 compatible CD drive as well as the semi-automatic "Climatic" air conditioning system to regulate the temperature inside the vehicle are available as standard to ensure your well-being. The doors can be comfortably locked via the radio remote-controlled central locking and the windows can be opened electrically with the push of a button.

**The comfortable and versatile solution:  
The Amarok Trendline.**

Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.

Sometimes, your workplace is not located in the middle of an industrial area, but out in the open country. And the best way to get there is in an Amarok Trendline 4MOTION. Whether with permanent or with selectable all-wheel drive with gear reduction –

you are sure to reach your destination fast and reliably. And if your worksite is even further off the beaten track: with an economical driving style, the efficient 2.0 l TDI engine\* can comfortably take you as far as 1,090 km with just one tank of fuel.

Why should work always come before pleasure? The Amarok Trendline already offers you plenty of comfort on your way to your clients – and makes a professional impression when you get there. It also supports you in your work: the load area is easy to

access via the extremely sturdy tailgate. A protection grille is available for the rear window as an option. And the standard electronic stabilisation programme automatically adjusts to the load conditions.

Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.  
\*Please refer to page 44 for information on fuel consumption and CO<sub>2</sub> emissions.

## The elegant and top quality solution: The Amarok Highline.

The Amarok Highline not only brings you to the top of the highest mountain with its selectable or permanent 4MOTION all-wheel drive, it also takes you higher when driving in the city. In addition to the equipment of the Amarok Trendline, the 17" alloy wheels „Aldo“, with flared wheelhouses, partially chrome-plated door mirrors and chrome applications on the front bumper and the chrome rear bumper turn the Amarok Highline into a real eye-catcher.

And the interior will also draw admiring glances: The steering wheel, gear lever knob and handbrake lever are leather-covered. And the seats are available in high-quality, partial leather trim upon demand, for example, with fine grain “Vienna” Anthracite leather upholstery. Various chrome applications further enhance the cockpit.

When you're on the road, the “RCD 310” radio system with six loudspeakers ensures great entertainment while the “Climatronic” air conditioning system provides a pleasant, cool temperature. The privacy glass on the rear side windows and rear window also offers ideal visual protection.

Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.

**The Amarok, the Amarok Trendline and the Amarok Highline.  
The right solution, no matter what the challenge.**

Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.

Exterior.

The design of the Amarok is not only functional, but extremely impressive to look at, too. You'll recognize the typical Volkswagen "face" with its distinctive front headlights from far away. In addition, the Amarok Highline is equipped with flared wheelhouses as standard. Large rear lights and a wide, sturdy tailboard perfectly round off the vehicle's strong look.

**Electrically-adjustable door mirrors.** They can be heated and are equipped with an integrated antenna. This way, you are not only offered a clear view, but a clear radio reception as well.

Illustration shows the Amarok Highline.

A T H

**Load platform illumination.** It lights up the load platform so that you can even load your vehicle in the dark. Additionally, a third brake light is integrated in the load platform illumination.

A T H

**Loading sill height and tailboard height.** At 780 mm, the loading sill is kept low for easier loading and unloading while the tailboard height of 508 mm is exceptionally high. This way, bulk cargo can also be transported without a problem.

A T H

**Front bumper with black graining.** Particularly robust and durable. Upon demand, the front bumper can be painted in the colour of the vehicle.

A

**Load area.** Thanks to a loading width of 1,222 mm between the wheel housings, the Amarok can even transport Euro pallets cross-wise – unthinkable for most pickups. This is due to the fact that the entire 2.52m² load area is used in an optimal manner. If needed, the sturdy tailboard can be used as practical extension of the load area and on models without a rear bumper, it can even be folded down at a 180° angle to make loading and unloading as easy as possible. And to ensure that everything stays in place, the load can be secured on four different lashing eyes using tie-down belts.

A T H

**Load compartment protective coating.** Sprayed directly onto the paint finish, this anthracite-coloured, UV-resistant special coating protects the load compartment from mechanical and chemical damage.

May lead to longer delivery periods.

A T H

**Aluminium load compartment cover.** This lockable cover made of corrugated metal provides the load area with reliable protection against rain and snow. Thanks to two gas pressure springs, it is easy to fold and unfold.

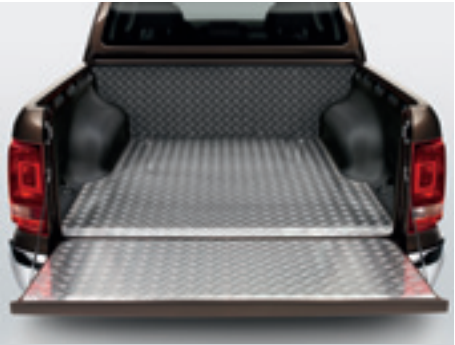

May lead to longer delivery periods.

A T H

**Body-coloured front bumper.** The front bumper is painted in the colour of the vehicle and gives the Amarok Trendline a dynamic appearance. Chrome applications on the upper radiator grille give your vehicle additional shine.

T

**Aluminium load compartment lining.** The front wall, load area and the tailgate are protected by perfectly fitted corrugated aluminium sheets while the side walls are also protected with an optimally fit plastic liner.

May lead to longer delivery periods.

A T H

**Load compartment tarpaulin.** It can be mounted on the quick-clamp attachments in only a matter of moments. Three cross-beams provide a high level of stability. The black tarpaulin is tear-proof, water-repellent and can be rolled up.

May lead to longer delivery periods.

A T H

**Front bumper with chrome applications.** Chrome applications on the upper and lower radiator grille and on the fog lights create a shining contrast to the auto body colour.

H Highline

**Off-road package I.** A robust Off-road package can be ordered as an option for the Amarok to make it even more suitable for driving on dirt roads and on open terrain. It includes an underride guard for the engine and gearbox as well as 245/70 A/T off-road tyres with 16" "Amazonit" alloy wheels. This package is available for the Amarok with rear-wheel drive or permanent 4MOTION all-wheel drive.

May lead to longer delivery periods.

**A T H**

**Off-road package HD** (not illustrated). This package is only available for the Amarok with selectable 4MOTION all-wheel drive. In addition to the standard underride guard for the engine, it also has a sturdy underride guard to protect the gearbox and the tank from damage. The 16" "Amazonit" alloy wheels with 245/70 R 16 111T XLA/T high profile tyres offer the necessary grip when you are driving on open terrain.

May lead to longer delivery periods.

**A T H**

**Rear bumper in black.** The robust bumper with a step tread perfectly rounds off the rear of the vehicle. Upon demand, the distinctive bumper can be deselected on the basic version of the Amarok.

**A T**

**Rear bumper chrome-plated.** The rear bumper made of chrome-plated steel has an integrated step tread to ensure that loading and unloading is even easier and more comfortable for you.

**H**

**Rear window protection grille.** It prevents loose cargo from chipping the rear window. The grille is mounted on the loading sill.

May lead to longer delivery periods.

**A T H**

**Chrome II exterior package.** You can upgrade the appearance of your Amarok with elegant applications and attachment parts made of high-grade steel. The package comprises a polished twin-tube styling bar and two chrome-look side bars as well as the bumper trim painted in two colours, which spans the entire front of the vehicle and underlines the off-road character of the Amarok.

May lead to longer delivery periods.

**T** Trendline

**Chrome III exterior package.** This exclusive package effectively underlines the powerful character of the Amarok. It includes a distinctive, chrome-appearance twin-tube styling bar made of high-grade steel, two chrome-plated side bars with a non-slip black surface and a two-tone bumper trim, which spans the entire front of the vehicle and underlines the off-road character of the Amarok.

May lead to longer delivery periods.

**A T H**

Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.

**Tow bar preparation.** With a trailer load capacity of up to 2,800 kg at a 12% incline, it is as robust as the Amarok itself.

May lead to longer delivery periods.

**A T H**

**Mud flaps at the front and rear.** They are made of plastic and mounted to the inside of the wheelhouses to protect your own vehicle and the vehicles behind you from dirt and stone damage.

**A T H**

**Underride Guard I package** (not illustrated). It protects the engine and gearbox from stone-chip, amongst other things, and is available for the Amarok with rear-wheel drive or permanent all-wheel drive. The Amarok with selectable all-wheel drive comes with a standard engine underride guard and can also be equipped with the **Underride Guard HD package**, which contains a robust underride guard for the gearbox and the tank.

May lead to longer delivery periods.

**A T H**

## Wheels.

Robust and powerful on open terrain, elegant on the boulevard. Or would you prefer a sportier look? Give your Amarok a distinctive exterior by choosing from a large range of alloy wheels in different designs and sizes to suit your personal taste requirements.

**Spare wheel** (not illustrated). Every Amarok is delivered with a spare wheel with standard-sized tyre. It is securely attached under the vehicle for easy access. In case you have selected alloy wheels, the spare wheel will be equipped with the same wheel rim.

**A T H**

**Exterior package in black.** This package gives the Amarok an even more distinctive look. The steel styling bar has a pipe diameter of 76 cm and is powder-coated black. Black side bars with step surfaces perfectly round off the appearance.

May lead to longer delivery periods.

Interior.

However tough a work assignment may be, nothing will shake you in the Amarok. The comfortable interior has equipment that you would only expect to find in a passenger vehicle. From the optional leather upholstery to the clearly laid out dashboard, the passenger compartment has been designed to make you feel comfortable. Particularly the generous amount of head and leg room provides you with plenty of space for enjoyment.

**Stowage pockets in the doors.** The driver’s door and the front passenger’s door each have side pockets, which can hold a drink bottle of up to 1.5 litres. The stowage pockets in the rear doors can each hold a 1 litre bottle.

A T H

**Cinema-style seating.** The seats can be folded up cinema-style to protect the upholstery. This way, you can transport your dog in the double-cab – or even electric appliances so that they don’t get rained on.

A T H

**Centre console.** A practical storage compartment is located behind the gear lever knob. It is equipped with a top cover as standard for the Amarok Trendline and Highline.

A T H

**Carpet floor covering.** It is particularly robust and creates a warm atmosphere in the passenger compartment.

A T H

**Robust floor covering.** The washable surface makes it even easier to keep the passenger compartment clean.

A T H

**Cockpit.** The premium look-and-feel of the materials and the ergonomic arrangement of the controls set a whole new standard for pickups. There are many stowage compartments, for example, on the doors, on the centre console and on the dashboard, to ensure that all your travel utensils are stored safely – and the glove compartment can even be locked. Extremely practical: the eyeball air vents allow a direct and precise regulation of airflow.

H

Highline

**Height-adjustable seats.** The driver and front passenger seats can be adjusted individually and ergonomically. So you'll arrive at your destination feeling relaxed.

A T H

**Convenience package.** Find the right angle in just a few seconds: the windows and electric door mirrors can be operated electronically at the push of a button. This package also includes central locking with radio remote control.

A T H

**12V socket.** Located on the dashboard, it can be used, for example, to connect a mobile navigation system.

A T H

**Cupholders.** Integrated in the centre console, the cupholders keep your drink secure. For the Amarok Trendline and the Amarok Highline, there are two additional folding cupholders in the passenger compartment.

A T H

**Interior, rear.** As soon as you sit down in one of the comfortable Amarok seats, you won't want to get up again. There is an impressive amount of head room and leg room on the rear passenger bench seat. Increased safety is assured by the three head restraints, three 3-point retractable seat belts and two ISOFIX child's seat mounting points. The cinema-style seats can be folded up quickly and easily. Entering and leaving the vehicle is just as easy thanks to the two grab handles attached to the B pillars on the Amarok Trendline and Amarok Highline.

Illustration shows the Amarok Highline.

H Highline

**Interior, front.** The interior has been designed with your well-being in mind. The two front seats offer individual height-adjustment and can even be heated upon demand. On the front passenger side, a grab handle facilitates entry to the vehicle, on the Trendline and Highline a grab handle is also attached to the A pillar on the driver's side. Two cupholders keep coffee and refreshments securely in place. Another practical touch: there are drawers underneath the seats so that you can store smaller items. Of course, your safety is also catered for: a driver's airbag and a front passenger airbag as well as two head/thorax airbags protect you in the unlikely event of an accident.

Illustration shows the Amarok Highline.

A T H

Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.

Engines, running gear and drives.

Maximum driving comfort, even on difficult terrain – this sets the Amarok apart from all other pickups thanks to its state-of-the-art gearbox technology, superior off-road capabilities and optimal traction. On tarmac roads, however, the Amarok stands out for its smooth and comfortable driving characteristics. So no matter whether you are faced with water, snow, mud or extreme inclines, the Amarok will bring you, your work materials and heavy equipment wherever you need to go quickly and safely. This is also ensured by its powerful 2.0 litre TDI engine with 90kW<sup>1)</sup> or the high-revving 2.0 litre BiTDI engine<sup>1)</sup>, one of the most efficient engines of our times. The two exhaust turbo chargers provide an impressive vehicle response at low revs and more powerful performance at high revs. With an output of **120 kW** (163 bhp) and 400 Nm torque, you can leave everyday behind you – as well as high fuel costs. Because the Amarok with rear-wheel drive and the 2.0 litre TDI engine has an average fuel consumption of just 7.31 litres per 100 km.

**Ramp angle.** The Amarok comfortably takes you across sticks and stones. And over significantly bigger things, too. With a ramp angle of 23°<sup>2)</sup>, even large obstacles such as tree trunks and rocks are no longer a problem.

A T H

**Approach and departure angle and wading depth.** The Amarok can brave steep hills as well as small fords. It has an impressive approach angle of 28° and a departure angle of 23.6° (28° without bumper) as well as a wading depth of up to 500 mm.

A T H

**Comfort leaf springs** (not illustrated). The comfort leaf springs are the ideal choice for those who require a payload of up to 948 kg<sup>2)</sup> but wish to have the vehicle response of a passenger car. These leaf springs significantly increase driving comfort, especially at higher speeds, and minimise the noise level at the same time.

A T H

**Side slope angle.** The Amarok has an affinity for extremes and can even handle roads with a lateral tilt of approximately 50°<sup>2), 3)</sup>. Now you'll be able to cross any slopes without a problem.

A T H

**Hill-climbing ability.** The Amarok can climb almost every mountain and carry your load at the same time: a trailer load of 2.8 t is not even a problem at 12 % incline. With a payload of 1 t, it can conquer hills with 100 % (45°) incline.

A T H

**Heavy duty leaf springs** (not illustrated). They allow a payload of up to 1.15 t<sup>2)</sup>, provide a high level of load safety and are so robust that they can even cope with extreme terrain effortlessly.

A T H

**Rear-wheel drive** (not illustrated). During acceleration, the vehicle weight is transferred to the back wheels for optimal road contact. Additionally, rear-wheel drive enables steering that is not influenced by the engine torque.

A T H

**Selectable 4MOTION all-wheel drive** (not illustrated). The selectable 4MOTION all-wheel drive ensures reliable traction on all road surfaces. Once activated via push-button, it distributes 50 % of the engine output to each of the axles to improve forward thrust. An additional gear reduction setting can be engaged to cope with extremely tough terrain or steep inclines. The electronic stabilisation programme also functions when selectable all-wheel drive is activated. And you continue to drive your vehicle with rear-wheel drive when travelling on paved roads.

A T H

**Permanent 4MOTION all-wheel drive** (not illustrated). This 4MOTION drive with Torsen differential makes the most of the dynamic driving benefits of all-wheel drive and is suitable for driving on paved roads as well as on open terrain. It is only available in conjunction with comfort leaf springs.

A T H

Safety.

The Amarok smoothly handles even the toughest terrain thanks to its numerous safety and assistance systems. The elaborate technology package, consisting of Off-road ABS and next generation electronic stabilisation programme with hill start and hill descent assistant, is unique in the pickup category. During extreme off-road driving, the Off-road ABS ensures controlled blocking of the wheels so that small bits of material from the ground build up to create brake wedges. This can substantially reduce the stopping distance of the vehicle without having a negative impact on its manoeuvrability. The electronic stabilisation programme automatically adjusts to the load conditions and helps prevent the vehicle from swerving. These measures – combined with maximum stability thanks to the robust ladder frame – makes the Amarok an ideal partner for the intense rigours of day-to-day work.

**Differential lock** (not illustrated). When the rear differential lock is activated, both wheels at the back of the vehicle are powered with the same amount of force and rotations. This offers optimal traction, even on sandy or slippery surfaces.

A T H

**Hill Start and Hill Descent Assist** (not illustrated). It prevents the Amarok from rolling backwards on strong inclines and allows a comfortable handling of the vehicle when pulling away uphill. Upon activation of the Off-road function, the assistant automatically brakes the vehicle to allow a safe and controlled descent.

A T H

**Airbags** (not illustrated). Every Amarok is equipped with up-to-date airbag technology. Just a few milliseconds after the crash sensors register an impact, the driver's airbag and the front passenger airbag are inflated with a gas mixture to protect the head and upper body area of the passengers. In addition, combined head/thorax airbags are integrated in the sides of the front seats. These are immediately activated following a side collision.

A T H

☐ standard  
☐ optional extra

A Amarok  
T Trendline

H Highline

1) Please refer to page 44 for information on fuel consumption and CO<sub>2</sub> emissions. 2) These figures may vary depending on the equipment line and engine type. 3) The side slope angle on the left-hand side is 49.7° and 50.8° on the right-hand side. Please note that these are static calculated figures. Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.

**Anti-lock Braking System (ABS).** If a wheel is in danger of locking, the system immediately intervenes by reducing the brake pressure in a controlled manner. This helps to keep the Amarok fully steerable when braking hard.

A T H

**Emergency stop signal** (not illustrated). In the event of an emergency stop at 50 km/h or above, the brake lights start flashing. If the vehicle comes to a standstill, the hazard warning lights are activated and will automatically switch off again as soon as you reach a speed of 10 bhp when you resume driving.

A T H

**Anti-Slip Regulation (ASR)** (not illustrated). If one of the driven wheels has an undesirably high rotation speed (slip rate), the system activates a partial braking procedure. This prevents wheelspin and facilitates a smooth acceleration.

A T H

**Electronic Stabilisation Programme.** The electronics help prevent the vehicle from swerving. In order to respond to critical driving conditions, the system evaluates data provided by a network of sensors. It can, for example, recognize what direction the driver is steering in and what direction the vehicle is moving in – and it is also informed on the load situation. Thus, it can build up brake force to offer directional stability when needed. At the same time, the electronic stabilisation programme is synchronised with the ABS, MSR and ASR functions and also remains activated with shiftable 4MOTION all-wheel drive. The laws of physics cannot, however, be overruled by the electronic stabilisation programme.

A T H

**Trailer stabilisation** (not illustrated). It complements the electronic stabilisation programme: should the trailer start to fluctuate heavily, the system slows it down by means of controlled braking and reduced engine torque. This steadies the trailer and increases driving safety.

A T H

**Electronic Differential Lock (EDL)** (not illustrated). If one wheel starts to spin, it brakes the wheel and transfers the entire power to the second rear-wheel on vehicles with rear-wheel drive and to the other three wheels on vehicles with 4MOTION. EDL can also be combined with an optional rear axle differential lock.

A T H

**Off-road ABS.** In addition to the standard ABS, Off-road ABS is available for the Amarok. It has been specially developed for use on difficult terrain. As soon as the Off-road ABS function has been activated – by pressing a button – the braking interval is increased. The wheels lock up in a controlled manner so that small wedges of material from the ground (such as gravel or sand) build up in front of each wheel. This can substantially reduce the stopping distance of the vehicle.

A T H

## Comfort.

When your day-to-day work assignments are tough and demanding, your journey to work should be as comfortable as possible. That’s why the Amarok offers you a variety of comfortable equipment such as the generous head room and leg room, the optional leather fittings for the Trendline and the Highline including heated front seats, and the high-quality air conditioning systems to make everyday life more pleasant.

**The technology package.** It consists of a cruise control and a multi-function display. The latter provides you with various data to help you drive economically and safely. This information includes, for example, the remaining range.

A T H

**“Climatic” air conditioning system.** It has an interior sensor, which continually regulates the climate inside the vehicle to meet the desired temperature setting. The degree of temperature, air distribution and blower speed can be adjusted individually.

A T

**“Cool & Sound” package** (not illustrated). Ensure a pleasant journey: the “Climatronic” air conditioning system with 2-zone temperature adjustment as well as the “RCD 310” radio system with an MP3-compatible CD drive and six loudspeakers, a leather-covered steering wheel, a leather-covered gear knob and a leather-covered handbrake lever.

T

**Anti-theft warning system** (not illustrated). Available in conjunction with central locking, this system includes an electronic immobiliser, a back-up horn as an audible warning signal as well as opening protection for the fuel lid, doors and engine compartment lid.

A T H

**“Climatronic” air conditioning system.** This system offers 2-zone temperature adjustment for the driver and the front passenger. It recognises the intensity of the sun’s rays and the outside temperature, and adds more or less cool air accordingly. The automatic air distribution mechanism and air quality sensors ensure a pleasant interior climate.

Multimedia.

In case the call of the wild isn’t enough for you, the Amarok offers a variety of attractive sound experiences: the radio systems provide great entertainment for the entire passenger compartment with up to six loudspeakers. And thanks to the hands-free facility, you can even talk to your loved ones while you’re at the wheel. Now nothing can stand in the way of an exciting yet relaxing drive.

“RNS 315” navigation function for the “RCD 310” radio system. The “RNS 315” has all the functions of the “RCD 310” and is additionally equipped with a touch screen colour display and a Bluetooth compatible hands-free set for mobile phones. Six loudspeakers provide optimum sound. Maps of Western Europe have been pre-loaded on the 4 GB flash memory so that you can listen to your favourite CD at the same time. An AUX-IN interface and an SD-card slot are integrated at the front of the system.

Volkswagen Genuine Accessories.

Designed for the Amarok and perfectly tailored to suit your needs: the extensive range of Volkswagen Genuine Accessories offer numerous extras that enhance the look of the vehicle, make driving even more comfortable and safe and help you with your work. But however diverse the range may be, all products have one thing in common: excellent Volkswagen quality that you can rely on no matter how tough the conditions.

Multi-use mounting points. The Amarok is equipped with two multi-use mounting points on the dashboard – easily accessible and in clear view for the driver. Several practical attachments are available for these mounting points: a cupholder, a picture frame, an ashtray with lid, a note clip or a magnetic holder for metal objects. The basic version can be retrofitted with a mounting bracket for the multi-attachment point.

A T H

Sticker package. The four high-quality, silver design film pieces with punched out lettering emphasise the stylish side of the Amarok. They should be attached to the lower door areas. The stickers are also available in black.

A T H

Volkswagen Genuine Accessories are only available at your Volkswagen dealer. Please refer to [www.volkswagen-zubehoer.de](http://www.volkswagen-zubehoer.de) or your Volkswagen dealer for further information. Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.

Four 6 ½ J x 16 “Amazonit” alloy wheels. With 245/70 R16 111T XLA/T tyres or 245/70 R16 111T XL winter tyres. The alloy wheels are compatible with snow chains. The wheel rim is also available individually.

A T H

Side bars. The polished stainless steel creates an athletic, sleek look. With a diameter of 76mm, the bars can be safely attached to the standard securing points without the need for additional drilling by using three fastening clamps each.

A T H

Side bars with tread plates. These side bars, made with highly-polished stainless steel, give the vehicle a dynamic and sporty feel. They feature robust black tread plates which can bear a weight of up to 200 kg.

Consumption and CO<sub>2</sub> emissions.

Diesel engines	Fuel tank capacity approx. 80 litres	2.0 litre TDI (90 kW/ 340 Nm) rear-wheel drive	2.0 litre TDI (90 kW/ 340 Nm) 4MOTION	2.0 litre BiTDI (120 kW/ 400 Nm) rear-wheel drive	2.0 litre BiTDI (120 kW/ 400 Nm) 4MOTION
Amarok DoubleCab					
Fuel consumption, l/100 km*	with manual gearbox:	6-speed	6-speed	6-speed	6-speed
	urban	9.1 – 9.2	9.2 – 9.4	9.4 – 9.5	9.6 – 9.7
	extra urban	6.4 – 6.5	6.5 – 6.7	6.7 – 6.8	6.9 – 7.0
	combined	7.3 – 7.4	7.4 – 7.6	7.6 – 7.7	7.8 – 7.9
Combined CO <sub>2</sub> emissions, g/km*	with manual gearbox:	192 – 194	194 – 199	199 – 203	206 – 209

The fuel consumption and emission figures have been determined in accordance with the measuring method stipulated (the version of EC regulation 715/2007 which is currently valid). **Note in accordance with the version of directive 1999/94/EC which is currently valid:** the figures do not refer to a particular vehicle and do not constitute part of the offer but are purely for comparison purposes between the various types of vehicle. In addition to the fuel efficiency of a car, driving behaviour as well as other non-technical factors play a role in determining a car's fuel consumption and CO<sub>2</sub> emissions. CO<sub>2</sub> is the main greenhouse gas responsible for global warming. A guide on fuel consumption and CO<sub>2</sub> emissions, which contains data for all new passenger car models, is available free of charge at every point of sale in the European Union and, for prospective buyers in Germany, at DAT Deutsche Automobil Treuhand GmbH, Hellmuth-Hirth-Strasse 1, 73760 Ostfildern.

\* The seats with Vienna upholstery are leather seats with leatherette parts. The illustrations on these pages can only be regarded as a general guide as the printing process cannot render the colours with absolute accuracy. The illustrations show the centre panel on the left-hand side and the side seat panel on the right-hand side. For partial-leather trim, the centre panel and the side seat panels are made of leather. Please contact your local Volkswagen dealer for details of the standard equipment and optional extras applicable in your country.

General information.

Take-back and recycling of end of life vehicles

Volkswagen meets the challenges of modern society and takes them into consideration in all new products of the Volkswagen brand. This naturally also applies to protection of the environment and resources. All new Volkswagens can therefore be recycled in an environment-friendly way and, subject to fulfilment of legal prerequisites, can be returned free of charge. You can obtain further details of this from your local Volkswagen dealer, on our Internet website [www.volkswagen-commercial-vehicles.com](http://www.volkswagen-commercial-vehicles.com) and under the telephone number 0800 – Volkswagen (0800 – 86 55 79 24 36) which is free of charge in the Federal Republic of Germany.

TDI® and 4MOTION® are registered brands of Volkswagen AG and other companies in the Volkswagen Group in Germany and in other countries. The fact that a mark is not shown with an ® sign in this document cannot be interpreted to mean that this mark is not a registered brand and/or that this mark could be used without prior approval in writing from Volkswagen Aktiengesellschaft.

Some of the vehicles shown are equipped with options at extra charge. Decoration contained in the illustrations is not included in the standard specification.

The standard and optional equipment cannot be shown in full in this brochure.  
Some options may result in longer delivery periods for the vehicle.

The data given here on specifications, equipment, appearance, technical data and operating costs of the vehicles is based on the features of the German market and is in accordance with the information available at the time of going to print. Your local Volkswagen dealer will be pleased to give you details of the differences in your specific country. Subject to change without notice.

Amarok: the support vehicle for the toughest rally in the world.

There is no race that is more arduous, none that is more demanding for man and machine: the Dakar Rally is a true legend. And in January 2010, it became the perfect framework for the first grand appearance of the Amarok.

Volkswagen dominated the famous contest on the race course and celebrated a triple victory in the automobile rankings of 2009 and 2010. Away from the action, the Amarok served as official supplier of the Dakar Rally 2010 in all of its stages, safely bringing the race management as well as the service teams to the finish line. Scorching hot temperatures, over 4,500 metre high passes – nothing could stop the Amarok on its almost 9,000 kilometre journey across Argentina and Chile. This is why it will be used as support vehicle again in 2011 to ensure that everything runs smoothly at the Dakar Rally.

For you, this has resulted in perfect technology – even under the most extreme conditions. Which means that you can trust in the “Tested by Dakar” seal of approval day after day.
